About QUEST

The [QUEST](#) project, funded by the Horizon 2020 Programme, aims to **foster investments in sustainable and energy efficient buildings** by integrating **quality management** methodology through the building life cycle. The QUEST methodology exploits the potential of quality management to **de-risk financial investments** in the sustainability and energy efficiency of buildings. Find out more on how to

QUEST NEWS

De-Risk Green Building Investments with our Technical Manual!

Financial investments into building projects don't always deliver on the expected performance results that owners or investors might have, this different between expected pre-defined performance and actual performance is called the "building performance gap". This gap is caused by technical issues in the building projects and in turn brings financial risks as they can lower the value of the building units. The Manual provides an easy explanation on how different Quality Management Services (Technical Monitoring, Building Commissioning, Green Building Certification) can be easily integrated into building projects to ensure the technical quality and mitigate the performance gap.

[READ MORE HERE](#)

[Directly download the Technical Manual by clicking here \(PDF - 5.6 MB\).](#)

The [QUEST Tool](#) had an update with improved accessibility and simpler usability for users. The Tool helps you to easily predict the financial added value of specific Quality Management Services to your building projects. The objective is to make it easier for investors and owners to assess which services are most beneficial for them to integrate into their building projects to guarantee the *quality* of the building performance.

Recording webinar | Quality Management: De-Risking Green Building Investments to Meet EU Taxonomy Requirements

WEBINAR

De-Risking Green Building Investments to Meet EU Taxonomy Requirements

22 March 2022 from 12:00 to 13:30

QUEST

BUILD UP

The European Portal For Energy Efficiency In Buildings

The QUEST consortium organised a webinar on 22 March 2022 on *Quality Management: De-Risking Green Building Investments to Meet EU Taxonomy Requirements*. The presentations explain how the QUEST toolbox can help building owners, investors & real estate developers to easily integrate Quality Management Services into their building projects. By applying these services they can de-risk their financial investments into sustainable projects as it helps to bridge the gap between calculated and actual performance of buildings. Simultaneously, they can ensure that the investments are Taxonomy aligned. The webinar was hosted by the [BuildUp portal](#).

Final event in Rotterdam at CLIMA 2022!

EYE ON
2030

Towards digitalized, healthy,
circular and energy efficient HVAC

REHVA 14th HVAC World Congress

22nd - 25th May, Rotterdam, The Netherlands

QUEST is organising it's final event at CLIMA 2022 through a workshop on "*Sustainable Finance in Building Projects: The EU Taxonomy & Financial Risks of the Performance Gap*" taking place on 24 May 2022 in Rotterdam, Netherlands.

The workshop will focus on bridging the gap between the financial community and technical expertise in building projects through the integration of Quality Management Services (e.g. Technical Monitoring, Building Commissioning, Green Building Certification).

You can still register for the CLIMA 2022 HVAC World Congress
